Art Unit: 2154

1. The current title is not descriptive. A new title is required that is clearly indicative of the invention to which the claims are directed.

**Art Rejections:**

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(e) the invention was described in-

(1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or

(2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

3. Claims 1, 4-7, 12, 25, 28-31 and 36 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Le, U.S. pat. No. 6,680,955.

Per claims 1 and 12, Le discloses a method and system for compressing a stream arriving at a compressor comprising:

Art Unit: 2154

- a) acquiring a pattern at the compressor (see col 10, lines 35-38),
- b) making sure a decompressor is synchronized with the compressor according to the pattern (see col 10, lines 38-47),
- c) sending a compressed packet according to the pattern (see col 11, lines 12-25).

Per claims 4-7, Le teaches synchronizing the compressor and decompress by sending two or more packets to decompressor and receiving acknowledge signals from the decompressor (see col 10, lines 43-47 and col 18, lines 51-61).

Claims 25, 28-31 and 36 are similar in scope as that of claims 1, 4-7 and 12.

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to

Art Unit: 2154

point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

6. Claims 2-3, 8-9, 13-14, 26-27, 32-33 and 37-38 are rejected under 35 U.S.C. 103(a) as being unpatentable over Le and further in view of Hamiti et al, U.S. pat. No. 6,751,209.

Le does not explicitly teach detecting a marker bit in the packet stream. The use of such marker bit in the packet stream is well known in the art as disclosed by Hamiti (see Hamiti's col 5, lines 18-24).

It would have been obvious to one of ordinary skill in the art at the time the invention was made to use such marker bit in the compressed packet because it would have enabled conveying proper information to the designated receiver.

It is noted that the sequence number is advanced for each subsequent packet.

**Allowable Subject Matter:**

7. Claims 10-11, 15-24, 34-35 and 39-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 2154
